

ABSTRACT OF THE DISCLOSURE

The invention may backup, maintain backups, or recover data associated with a computing system. The computing system may include any number of components including hardware and software, and any memory accessible to the computing system. The computing system may focus on a user computing system and potentially the supporting environment which stabilizes the functionality of the user computing system (e.g., operating system, BIOS, etc.). Typically data associated with the computing system is identified by a variety of characteristics, the data is stored as a backup, and subsequently data within the backup may be restored or used to evaluate an existing computing system.
